Купить, заказать диодные лазерные сборки, диодные матрицы, универсальные манипулы, ручки для диодных лазеров для эпиляции. Продажа запчастей и комплектующих для лазеров в России и СНГ.

Продажа матрицы для диодного лазера любого типа. Вы можете заказать диодные сборки (выбор по мощности,барам)и другие запчасти и комплектующие для ремонта и восстановления работоспособности диодного лазера . Универсальные манипулы на диодный лазер. Ремонт лазеров и оборудования для диодной эпиляции.

Мы **предлагаем** под заказ **диодные лазерные сборки** , универсальные манипулы для аппаратов диодной эпиляции. Мы можем поставить с доставкой комплектующие и запасные части для любых диодных и гибридных лазеров, диодных лазеров с вакуумным усилением и аппаратов для эпиляции: Kiers 144, Kiers 145, D-las, FG-2000B, DPSS, SHR BL1, Wingderm, SL 600, SL 500, DL-07, FG2000D, SDL-C, Ruikd, LD4, Silvano, Esteban+ **и других марок**.

ДОСТАВКА ПО РОССИИ И СТРАНАМ СНГ. Различные виды оплаты.

ПРОДАЖА диодных лазеров в следующем разделе сайта .

ДЛЯ ЗАКАЗА и консультаций по **диодным сборкам** электронная почта Gnenik_roman@mail.ru **телефон** (вотсапп,телеграмм) +7 (918) 0110-234(Роман).

Ниже ознакомительная информация по устройству диодных манипул, видам диодных сборок, проблемам диодных лазеров. Множество фотографий с ремонта и новым запчастям и комплектующим для диодного лазера. Если Вас интересует какой то вопрос, то Вы можете проконсультироваться.

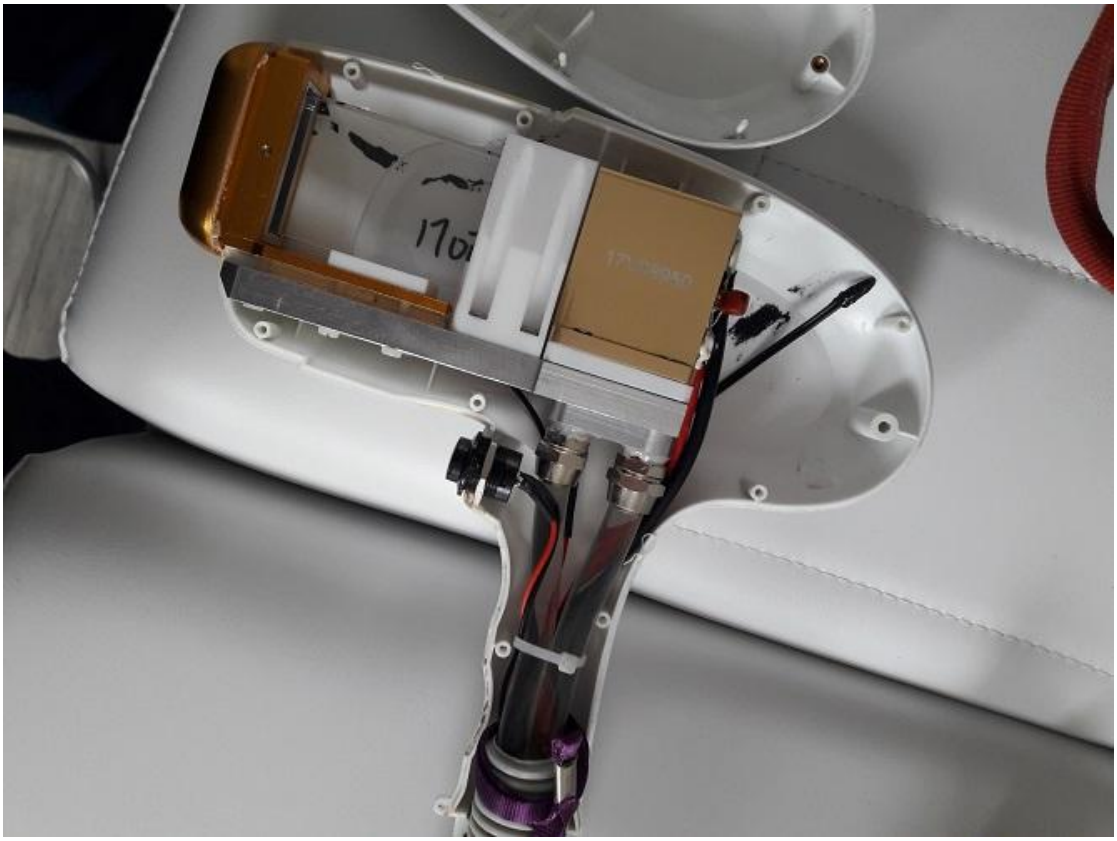
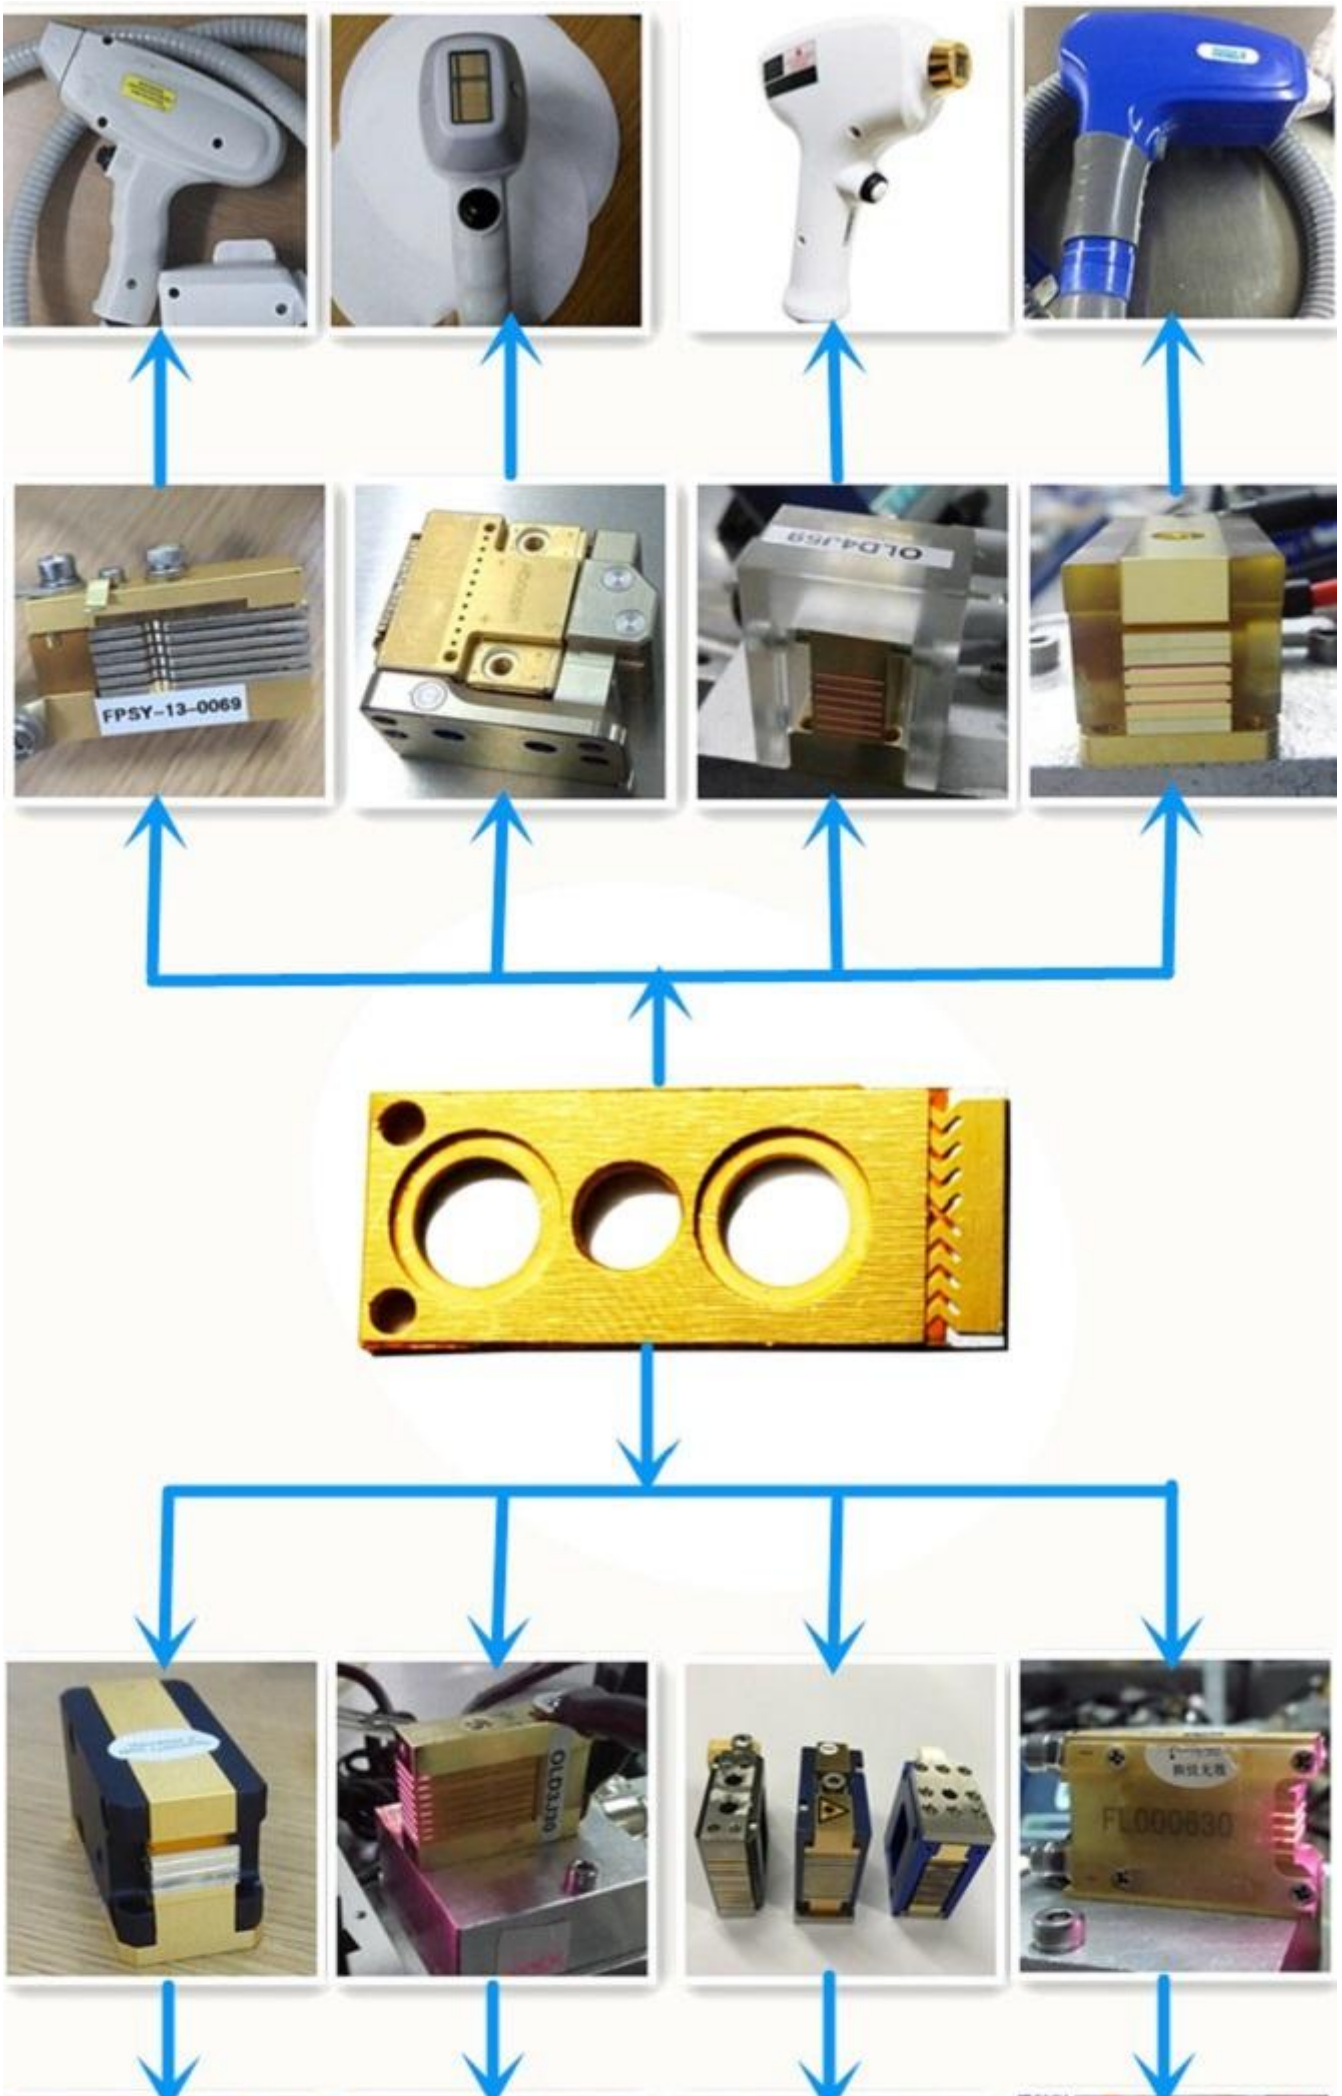
На фотографии ниже диодная сборка (диодная матрица) внутри манипулы диодного лазера.



Диодные матрица различаются по видам.



FPSY-13-0069

Диодная матрица состоит из диодных стэков. **Сборки лазерных** диодов (также называемые массивом **лазерных** излучателей, стеками или матрицами) состоят из определённого числа **диодных лазерных** сборок или баров, которые образуют единый излучающий массив. Наиболее распространённым расположением баров является вертикальное расположение,

Diode Laser modules voor Ontharing

Módulos de Laser de Diodo para a Remoção Do Cabelo LSKCSH

Diode Laser Module für Haar Entfernung

Modules Laser à Diode LSKCSH pour épilation

Особенности:

1. Диодный лазерный модуль состоит из диодного лазерного массива и диодного лазерного драйвера.

2. Диодный лазерный модуль с защитным окном.

3. Симметричный луч

4. Простое водяное охлаждение и отсутствие высокого давления и воды высокого качества

5. Полностью герметичный и заполненный азотом, с сильной экологической адаптируемостью и высокой стабильностью;

6. Прямоугольный симметричный точечный выход, высокая плотность энергии, легко формируется;

7. Окно покрыто Антибликовой Пленкой для уменьшения потери мощности;

8. Структура рассеивания тепла макро-канала, простое водяное охлаждение;

9. Плата привода интегрирована и обладает высокой выходной стабильностью.

Технические характеристики:

Тип: GTHM-500

Пиковая мощность на выходе: 500 Вт

Максимальный рабочий ток: 50A

Максимальная ширина импульса: 400 мс

Максимальный рабочий цикл: 40%

Длина волны: 780-820 нм, 900- 980 нм Спецификация

808nm High Power Diode Laser Hair Removal Handle Piece Demo.

Conductively Cooled Package (CCP) vertical laser diode stacks are mainly designed for low duty solid-state pumping. NDL is working hard to improve the optical power density for these stacks to get max output power within a limited optical window. This kind of laser stack is widely used for Nd:YAG pumping to get high pulse energy in QCW or Pulsed mode.

Features:

QCW laser diode bars with peak power 100W~300W

1~100 bars per stack

Typical 808+/-3nm, other wavelength available

Long life time > 1G Shots

Support custom package design

Micro-Channel Cooler Package (MCCP) is designed for high power CW diode bars up to 60W and 80W. The Micro-Channel Cooler (MCC or MC2) is a high efficiency heat-exchange heatsink. These MCCP package can provide up to >1KW CW output power from a single stack for directly heat treatment for industry, such as metal hardening, laser cladding, welding and etc. It is also widely used for hair removal applications.

Features:

Optical power 60W, 80W or 100W CW per bar

1~20 bars per stack

Vertical & horizontal stacks available

Typical 808+/-3nm, other wavelength (940nm, 976nm)available

Long life time > 10,000 hours

NDL provides various cooling devices and temperature controllers for lasers, including:

Features:

Peltier (TEC, TE Cooler) Temperature Controller for lasers

Forced Air Cooling Stage for lasers.

Water Cooling Stage for lasers

Laser Water Chiller

Support high operation temperature up to 380°C

SMA-905, ST, FC/PC connectors for patch cords

Collimation or focus head available
